

Air Dryer Installation Kits

The PUREGAS Air Dryer Installation Kits include all the necessary fittings and valves required / recommended to connect an air dryer to the supply line. These kits are universal for accommodating dryers with the outlet port on the top or on the back of the dryer.

* in P011752 only

P011752 - 1/2" Outlet Installation Kit

- For dryers with a 1/2" outlet port
- Allows for connection to 1/2" tubing or 3/4" flex hose

P011890 - 3/4" Outlet Installation Kit

- For dryers with a 3/4" outlet port
- Allows for connection to 3/4" flex hose

Air Dryer Monitoring Integration

PUREGAS enables you to take full advantage of the information from your dryers by allowing them to be integrated with the PUREGAS monitoring systems. These products complete the ensemble by giving you dryer readings right along with those from your panels and transducers.

PVDW30 - Protocol Converter

Designed for data transfer and communication between PUREGAS digital dryers and monitoring systems. Allows for a full range of readings and settings to be displayed and set through the monitoring interface.

PVDW40 - Protocol Converter

Designed to enable the digital information available in remote PUREGAS dryers (P4200WPM) to be monitored in detail requiring only a single wire pair from up to 90 miles away.
