

# CDA Series

## Clean Dry Air Packages

PUREGAS' Clean Dry Air (CDA) packages are complete compressor, dryer, filter, regulator packages for applications requiring low volumes of clean, dry, compressed air at pressures up to 75 PSIG. The CDA Series uses a reliable oil less compressor to assure oil-free air at all times as well as proven heatless dryer utilizing twin tower technology for a continuous dry air supply. Superior performance and long life is attained by incorporating these unique design features.

### Product Features:

- Reliable oilless compressor to assure oil-free air at all times
- Equipped with rocking piston pump technology for long interval times between maintenance and easy service
- Proven heatless dryer uses twin tower technology for continuous dry air supply.

### Typical Applications:

- Environmental Chambers
- Laboratory Applications
- Particle Measurement
- Dry Purge Gas
- Waveguide Dryer
- Dry Nitrogen Replacement

### Specifications:

	<b>CDA10</b>
Max Outlet	10 SLPM
Dew Point	-100°F ADP
Power Requirements	115 VAC, Single Phase, 50/60 Hz or 230 VAC, Single Phase, 50/60 Hz
Height	14"
Width	24"
Depth	18"
Weight	72 lbs

Compressed air must be treated to make Clean Dry Air (CDA) before use in most applications. The need for compressed clean dry air is necessary for anyone trying to increase the productivity of sensitive pneumatic applications such as automotive exhaust emissions analyzers, control analyzers, infrared detectors, laser applications, and gas chromatography analyzers that require clean dry air.
